Featured Staff Member: Harnoor Sidhu

Another one of our newest members here at Planet4IT is Harnoor Sidhu. A recent Ryerson University graduate, he is an expert on new technologies and advancements that are just appearing on the horizon.

A hard worker, Harnoor has never skipped, been late or dropped a single class through his entire University career. He brings that same determination and dedication to everyone and every project he works on.

He's also a bit of a movie buff – so whether you want to chat about a career change, or just about the latest Sundance movie, he's the man to talk to.

You can reach Harnoor by calling Planet4IT, his email or his LinkedIn page.

How does Market Risk apply to Alibaba?

Have you heard of Alibaba? Probably not, but that would make it the largest company you've never heard of.

It accounts for 80% of all online retail sales in China.

The company was first created by Jack Ma in 1999. At that time, the website helped to connect exporters in China (and other countries) with other companies and countries around the world.

The system would, for example, let a business in the UK find a manufacturer in China.

POLL

Poll Winner

FEATURED CANDIDATE

Featured Candidate

The winner of last issues Poll question is Chrispen Denhere.

The question was: **Which city will be the financial centre of the world in a decade and why?**

I think it will be Hong Kong. There are too many regulations in the Americas and European region. China is already the 2nd largest economy in the world; it's ripe for a take over. I don't think New York or London stand a chance even if they update their technologies. It's a game of numbers. How many people does the west have left in its middle class? China is the future.

Chrispen has won a Tim Hortons gift card! Thank you to everyone who submitted responses.

FEATURED JOB

Featured Job: Product Implementation Specialist - Commodities Technology

An excellent contract or permanent opportunity in Toronto, working with a world-wide leader in the Financial Services and Commodities Technology Consulting areas.

They are looking for people to assist in current implementations underway at Canadian banks. Looking for consultants with specific implementation experience with any of Murex, Calypso or OpenLink.
